

Parallels® Plesk Panel

Data Sheet

Parallels Plesk Panel Mobile Server Monitor and Mobile Server Manager

Parallels Plesk Panel Mobile Server Monitor

Parallels Plesk Panel Mobile Server Monitor helps administrators obtain the most important information about their Plesk Panel servers from selected smartphones.

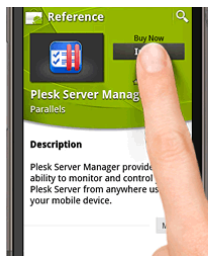

Features

With Parallels Plesk Panel Mobile Server Monitor, administrators can:

- View the list of services on a particular server.
- View information about a server: OS, CPU, Panel version.
- View vital indicators of a server health: CPU load average, memory consumption, swap usage.
- Subscribe to Panel events and unsubscribe from them.

How to Get Parallels Plesk Panel Mobile Server Monitor

Parallels Plesk Panel Mobile Server Monitor is available for iPhone, Android and BlackBerry devices. To use Parallels Plesk Panel Mobile Server Monitor you must be running Parallels Plesk Panel version 10.4 or later.

Download Parallels Plesk Panel Mobile Server Monitor

Download Parallels Plesk Panel Mobile Server Monitor for iPhone from iTunes

Download Parallels Plesk Panel Mobile Server Monitor for Android from Android Market
