With Parallels Plesk Panel Power Pack you can:

Monitor and Manage Servers From Your Smartphone

Parallels Plesk Mobile Server Manager allows access Parallels Plesk Panel server information and to control core administrative functions from iPhone, Android and BlackBerry devices. Offer your customers free Plesk Server Mobile Monitoring and offer Plesk Server Mobile Management to upsell Parallels Plesk Panel Power Pack.

Protect your users from viruses and other malicious intrusions

Kaspersky Antivirus is award winning e-mail antivirus scanning software from Kaspersky Labs that combines traditional anti-virus defense methods with the latest proactive technologies to provide solid and dependable protection against malicious programs, viruses, spyware, Trojan viruses, worms, and keyloggers.

Easily Render Websites for Mobile Devices

UNITY Mobile is an extremely powerful yet easy-to-use platform that enables any organization to create, publish, and manage mobile websites and native mobile applications. Offer customers mobile rendering of their websites that sets up in minutes.

Let Developers have the best Java tools

Tomcat is the Servlet container that provides the environment for executing Java Servlets. The Tomcat add-on supports deploying and managing Tomcat web applications allowing users to set up hosting with JSP support. This support allows you to deploy a wide range of Java based applications.

Make customers stickier with a ColdFusion environment

ColdFusion is one of the most popular development environments on the market. When an application uses ColdFusion, the end customer sticks with it longer. Using this add-on module, admins can configure ColdFusion paths and enable/disable ColdFusion support in the setup.

Support popular databases

PostgreSQL or MSSQL add-ons include web-based database administration software (like phpPgAdmin), giving users remote access to their databases. With one of the world's most advanced relational database management systems, Power Pack enables users to deploy and manage databases right from the user interface with a few clicks.
