

## HP and Parallels

Parallels Plesk Control Panels

# Comprehensive control panel solution used by leading service providers worldwide for shared, virtual and dedicated hosting

### Scaling your business

The Parallels Plesk Control Panel is a comprehensive server management software designed to install and manage all systems and applications for hosting on a single server. Created to empower growth and allow system administrators to manage up to thousands of virtual hosts on a single machine.

### Designed for professional hosting providers

For use with shared, virtual or dedicated hosting, the Parallels Plesk Control Panel is the most stable and most secure multi-platform hosting control panel on the market. The tiered self-administration allows for ease-of-use for server administrators, resellers, domain owners and end-users alike. Non-technical staff can easily create, setup, and manage accounts while customers self-administer their virtual domains without technical support. Tech savvy customers will find the solution comprehensive yet inexpensive and will provide utilities and unique tools available for further automation and integrating third party applications.

Plesk Control Panels can be extended with Plesk Expand, Sitebuilder and Billing. Expand is an add-on that combines multiple Plesk servers into an integrated, centrally managed hosting platform. Sitebuilder is a scalable solution designed to create and manage websites. Billing is an advanced, automated recurring billing application designed specifically for the web hosting, internet service provider (ISP) and wireless internet service provider (WISP) markets. Third-parties also offer certified Plesk Partner Products to extend the value of Plesk deployments.

### Solution benefits

- Clean, professional and intuitive interface makes the Plesk Control Panel easy to use
- Specifically designed to be the most stable and secure control panel available
- Improves overall system security, including support for third party file transfer protocol (FTP) servers
- Full integration with other Parallels and third party products
- Multi-platform support (Red Hat/SuSE/Fedora/FreeBSD/Debian/CentOS/Ubuntu/Microsoft® Windows®)

### Working together with HP

Working collaboratively with the HP Communications, Media & Entertainment (CME) business unit, we provide broadband and media solutions, network services, and end-user services to companies like yours. To deliver highest-quality solutions and services, we leverage the HP Services Marketplace through HP Service Delivery Platform, as well as the Network Operational and Business Support Systems (OSS/BSS) supported by HP Integrated Service Management. An industry leader with more than 30 years' experience in the communications, media and entertainment industry, HP helps service and equipment providers, as well as media, entertainment and cable operators, meet the most demanding subscriber needs. Agile business solutions powered by HP platforms and backed by HP Services enable customers to drive up success while driving down both risk and cost.

## Delivering Value

Clean, professional and intuitive interface makes the Parallels Plesk easy to use. The control panel comes with many additional skins and even gives users the ability to design custom skins and manage them in the browser-based interface. Specifically designed to be the most stable and secure control panel available, Plesk has been battle-tested, managing 10 million plus domains globally, and can support thousands of accounts per server. The Plesk Control Panels subsystem improves overall system security as well as support for third party FTP servers that make secure uploads possible. Full integration with other Parallels and third party products, including Parallels Virtuozzo Containers, Business Automation, System Automation and Plesk Sitebuilder. The completely customizable "Application Vault" can manage dozens of integrated applications including Ecommerce, Chat and Bulletin Board. Full automation features like auto-update mechanism, auto-component updater, migration manager and web-based installation enables quick deployment and reduces complexity.

### HP products supported

Our solutions are built on best-selling HP ProLiant servers, world-renowned for reliability and availability. From server blades to clustered servers, HP ProLiant provides the utmost confidence for your business. With new Opteron- and Xeon-based HP ProLiant models, HP further extends the advantages of x86 computing—delivering more cost-effective, industry-standard solutions for applications requiring expanded memory and outstanding price/performance. For mixed computing environments that include Microsoft Windows and Linux applications, HP ProLiant is your best choice for long-term dependability, flexibility and growth.

### Operating systems supported

Our Linux-based solutions are built on innovative software and standards-based servers—delivered by service professionals with extensive experience. By working with HP, we can leverage its worldwide leadership in Linux to provide optimized solutions based on HP Open Source Integrated Portfolio (OSIP) and HP Open Source Middleware Stacks (OSMS). You can trust our combined expertise to provide the proven, cost-effective Linux solutions you need to drive a fast return on your IT investments.

### Service and support

Working with HP, we can provide you with a complete portfolio of services tailored to your unique business and IT needs. We leverage the proven methodologies and expertise of over 65,000 HP Services professionals around the world to help your organization design, build, integrate, manage and evolve a next-generation infrastructure that enables you respond to business changes quickly, easily and cost-effectively.

### Building on the value of strong relationships

By working with HP, we have the resources, experience and knowledge of an industry leader to ensure our solution delivers the business results and value your company requires. HP is a company that thrives on innovation, with a proven track record of success in virtually every market, customer segment and region worldwide. Together, we have the technology and services to meet your most demanding needs.

Parallels virtualization and automation solutions are used by more than 10,000 hosting providers and their customers worldwide to deliver optimized hosting services based on Parallels Virtuozzo Containers, Parallels Plesk products and Parallels Automation. These products are validated on HP server platforms to ensure successful implementation.

### Working together to drive success

By combining standards-based and modular technologies with our leading-edge applications and a full portfolio of services, you gain a powerful, flexible solution that meets your business needs today—and adapts dynamically as those needs change. That's the foundation for building an agile, responsive enterprise in which business and IT are synchronized to capitalize on change. That's a solution that will drive your success for the long term.
