

What's New in **Parallels Device Management 9**

Increase the productivity of IT administrators and improve the end-user experience.

- Simplify the enrollment of Mac and Apple mobile devices.
- Tap into a powerful new profile configuration editor.
- Easily deploy mobile Volume Purchase Program (VPP) applications.
- And, so much more!

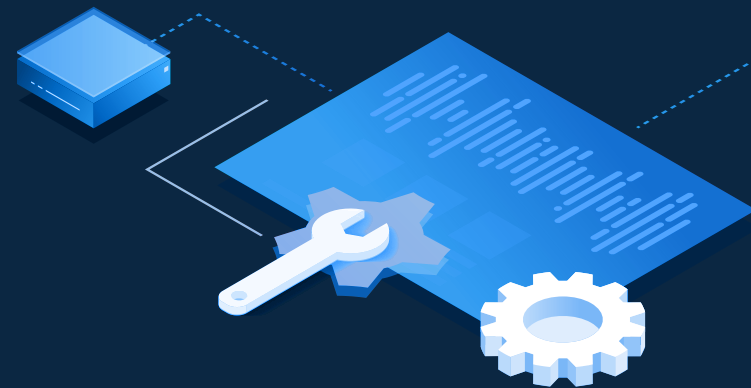

VPP APPLICATIONS FOR APPLE MOBILE DEVICES

IT administrators can streamline the deployment of VPP apps to the Apple mobile devices of employees, improving productivity and end-user experience.

DEVICE ENROLLMENT PROGRAM (DEP) FOR APPLE MOBILE DEVICES

DEP functionality enables zero-touch configuration and enrollment of Apple mobile devices to Microsoft Endpoint Configuration Manager (MECM).

USER ACCOUNT CONFIGURATION DURING DEP ENROLLMENT

Enhance Mac manageability and security by creating and configuring local management accounts centrally.

INSTALLING CONFIGURATION PROFILES DURING DEP ENROLLMENT

Reduce the time required for initial device configuration and improve the deployment experience for macOS and iOS end-users.

POWERFUL CONFIGURATION PROFILE EDITOR

Create and modify profiles in the new powerful iMazing Profile Editor, integrated directly into the MECM Console. Save time and boost productivity.
